

CoproBan™

Chewable Anti-coprophagic

Roast Beef Flavored Soft Chew Coprophagia Deterrent for Dogs

Take a bite out of a bad habit with CoproBan™ from PRN. Coprophagia is a behavior that few pet owners can tolerate. Although the causes of coprophagia can be debated, the solution is CoproBan.

CoproBan is a chewable roast beef flavored coprophagia deterrent. Conveniently packaged as a 3-gram soft chew tablet in an individual blister pack, CoproBan contains MSG and Cellulase to assist in the break down of fiber.

- No more messy powder residue left in the food bowl
- No more uncertain dosing
- And no more bad habit!

A convenience for your clients, a professional product for your clinic - CoproBan.

CoproBan may also be fed to cats to deter litter box feeding.

5 blister packs to a strip,
4 strips per box.

CoproBan™

Chewable Anti-coprophagic

Roast Beef Flavored Soft Chew Coprophagia Deterrent for Dogs

A Roast Beef Flavored Soft Chew to Render the Dog/Cat Stool Undesirable.

Enzyme Activity:

Cellulase (aspergillus niger var.) 31 CU/gram

Ingredients:

MSG, partially hydrogenated vegetable oil, natural and artificial flavors, Cellulase from dried Aspergillus niger fermentation product, soy lecithin, salt.

Uses:

A convenient, easy to use, roast beef flavored soft chew used to deter coprophagia (stool eating) behavior in dogs and cats. CoproBan may be fed to cats to discourage dogs from raiding the cat litter box.

Directions For Use:

For dogs and cats:
Less than 40 lbs, feed 1/2 soft chew with each meal.
Over 40 lbs, feed 1 soft chew with each meal.
Feed 1/2 soft chew for every 40 lbs thereafter.

Storage And Safety:

Store at room temperature 15°-30°C (59°-86°F)
Keep out of reach of children and pets.
Use only as directed.
Not for human use.
For Veterinary use only.
