

ProZyme®•V Feline Formula

A Natural Food Supplement to Support Healthy Digestion in Cats

Cats require a protein-rich diet to meet their distinct nutritional needs. Most commercial pet foods do not meet those needs, which can lead to a variety of digestive challenges. ProZyme®•V Feline Formula is a natural food supplement designed to support healthy digestion in cats. ProZyme®•V Feline Formula was developed by a veterinarian exclusively for the veterinary market.

The proprietary formulation of four plant derived enzymes in ProZyme®•V Feline Formula supports proper and efficient breakdown of carbohydrates, proteins, fiber and fat. Additionally, ProZyme®•V Feline Formula contains other crucial vitamins and minerals essential to support optimal digestion for healthy cats, cats with digestive disturbances and senior cats.

Cats have especially high requirements for dietary taurine due to the limited ability to synthesize this vital nutrient from other amino acids. The deficiency of these amino acids in the diet can lead to clinical disease over time. ProZyme®•V Feline Formula provides 125 mg per serving of dietary taurine.

The natural diet of cats is higher in potassium than what is found in most commercial pet foods. ProZyme®•V Feline Formula provides an additional source of digestible potassium which is especially important for cats with digestive disturbances.

ProZyme®•V Feline Formula should be included at every feeding.

Why ProZyme®•V Feline Formula?

- Inulin as a fermentable fiber source
- Additional taurine for support
- Provides supportive omega-3's
- Antioxidant benefits from Vitamin E
- Works well with all diets
- Proven palatability
