AND OLDER AND 5 LBS. AND OVER**

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

HAZARDS TO HUMANS: Repeated exposure to etofenprox can cause skin irritation. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

HAZARDS TO DOMESTIC ANIMALS: For External Use on Cats Only. **Do not use on kittens weighing less than 5 pounds. Do not use on kittens less than 12 weeks old.** This product is not a substitute for prescribed heartworm preventative. Consult a veterinarian before using this product on debilitated, aged, pregnant or nursing cats. Certain medications can interact with pesticides. Consult a veterinarian before using on medicated cats. Sensitivities may occur after using **ANY** pesticide product for cats. If signs of sensitivity occur, bathe your cat with mild soap and rinse with large amounts of water. If signs continue, consult a veterinarian immediately. Due to the bitter taste of the product, oral exposure could result in salivation. Be careful not to get any product in the cat's mouth during application. For multiple cat households, prevent the cats from grooming each other until the product has dried. If the salivation continues or other clinical signs are noted, please call 1-888-241-9545.

INTRODUCTION: A unique, convenient applicator for you. The Vet-Kem® Applicator is designed to make applying flea and deer tick control easier, more precise - and neater - than ever before. You simply insert the appropriate Vet-Kem® tube for your cat/kitten into the applicator, close it and squeeze to apply. The applicator's ergonomic, contoured shape makes it easy to grip and a built-in tip helps to spread the cat's/kitten's hair to allow the liquid to more readily reach the skin. The tube is sealed inside, so you can be confident that the liquid goes onto your cat/kitten - and not your hand.

Vet-Kem® Flea And Tick Spot On® For Cats is a topically applied long-lasting, flea and deer tick treatment product specifically formulated for cats and kittens with an insect growth regulator (IGR) which prevents flea eggs from maturing into biting adults. It also contains the flea, deer tick, and mosquito killing agent Etofenprox, which kills biting adult

fleas, deer ticks, and mosquitoes your cat/kitten may acquire from its surroundings. A single application of Vet-Kem® Flea And Tick Spot On® For Cats will provide flea egg hatch inhibition for up to 30 days. Each package contains enough product for 3 monthly applications (90 days of protection). Vet-Kem® Flea And Tick Spot On® For Cats provides relief from flea infestations for up to 1 month by killing adult fleas and flea eggs. Adult fleas can live on your cat while producing vast numbers of eggs, which drop off your cat and develop in the surrounding environment. Vet-Kem® Flea And Tick Spot On® For Cats kills adult fleas and flea eggs, breaking the flea life cycle and providing your cat/kitten relief from flea bites at the same time.

After application, your cat's/kitten's skin oils carry Vet-Kem® Flea And Tick Spot On® For Cats over your cat's/kitten's body for protection against biting adult fleas and the development of flea eggs. Once adult fleas are evident on your cat/kitten, there is likely an infestation of flea eggs and flea larvae in your home. To completely kill the existing flea population, you may need to treat your home and your cat's bedding (home sprays, foggers), as well as your yard (yard spray) with traditional flea products approved for use on pets, around the home, or in your yard. Vet-Kem® Flea And Tick Spot On® For Cats can be used in conjunction with other Vet-Kem® premise products. As with all flea products, Vet-Kem® Flea And Tick Spot On® For Cats is most effective when used as part of a total program aimed at reducing all stages of fleas in the cat's/kitten's environment. Vet-Kem® products are designed to complement each other in an integrated program for flea, deer tick, and mosquito management. To assure proper treatment, we recommend use of Vet-Kem® products as directed to treat all pets in the household, as well as the indoor and outdoor home environments.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read and follow all directions and precautions on this product label.

This product contains 3 monthly dosages, each 0.061 fl oz.

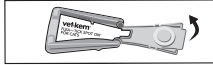

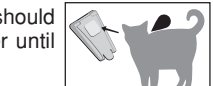

USE RESTRICTIONS: Do not apply more than once every month. Do not use more than one tube per cat. Do not use on kittens less than 12 weeks old. Do not get this product in your cat's eyes or mouth. Do not allow your cat to ingest this product. Do not apply to cats weighing less than 5 lbs. In multiple cat households, do not allow the cats to groom each other until the product has dried. Do not allow children to apply this product. Do not spread this product by hand over the cat/kitten. Do not bathe the cat/kitten within the first 24 hours after Spot On® has been applied.

Vet-Kem® Flea And Tick Spot On® For Cats works by application directly to the cat's/kitten's skin, not to the hair. When applying, use applicator device tip to push aside cat's/kitten's hair to allow direct application to the skin.

The Vet-Kem® Flea And Tick Spot On® For Cats provides a unique applicator device that allows cat/kitten owners to treat their cats/kittens more securely, and dispose of liquid cartridges with less mess.

0.061 fl oz dose for use on cats and kittens 5 lbs. and over only and 12 weeks of age or older.

To apply the Vet-Kem® Flea And Tick Spot On® For Cats treatment, use one disposable liquid cartridge tube for each application with the applicator device. Do not use more than one vial per cat.

1. **OPEN:** Use finger scoop to lift open light gray door. 
2. **LOAD:** To load, place tube WHITE SIDE UP into the applicator. 
3. **CLOSE:** Close the light gray door of the applicator and the tube will snap open. 
4. **APPLY:** The cat/kitten should be dry and standing for easy application. To apply, use tip to part hair and get next to cat's/kitten's skin at the base of the skull. Press square on light gray door and squeeze out the entire contents of the tube onto the cat's/kitten's skin. 
5. **DISPOSE:** To dispose of empty tube, open light gray applicator door and drop empty tube into trash or offer for recycling, if available. Close applicator device door and store in original package. 
6. **RETREAT AFTER 30 DAYS:** Do not reapply product for 30 days. Do not treat more than once per month.

NOTE: Each package contains sufficient tubes for 3 applications.

Vet-Kem® Flea And Tick Spot On® For Cats is most effective when used as part of a total flea and deer tick management program. Use other Vet-Kem® products registered for residential area control of these pests in conjunction with this treatment. Monthly treatments are required for control and prevention of fleas.

STORAGE and DISPOSAL:

Storage: Store in a cool, dry (preferably locked) area away from children and animals. Do not store unused tubes separately from their packaging.
Pesticide Disposal and Container Handling: If empty: Do not reuse empty tubes. Place in trash or offer for recycling if available. **If partly filled:** Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

In case of emergency or for product information, call 1-888-241-9545 or contact your veterinarian if your cat/kitten is experiencing an adverse event.

Side Effects: Monitor your cat after application. Side effects may include signs of skin irritation such as redness, scratching, or other signs of discomfort. Gastrointestinal signs such as vomiting or diarrhea have also been reported. If these or other side effects occur, consult your veterinarian or Vet-Kem® at 1-888-241-9545.
